

## NEW BEGINNINGS

### NEW PERMANENT LOCATION!

On 24 July, we signed the paperwork for a permanent location in Salima. Staff families will be moving there soon and refurbishing of the property will start immediately. We hope to get students on campus as quickly as possible.

Some facts about the new property.

Main Bible building will have two classrooms, three office spaces, a conference room, library, and at first will house a kitchen and dining room.

12 dorm rooms that can hold 4 students each and have bathroom and showers in each room.

2 buildings that may be turned into a trades school and cafeteria/student life center.

Property sits on 1 hectare of land or about 2.5 acres and will have room for maize, garden and fruit trees to help produce an income for school as well as feed the students.

We are looking at doing the update building in three phases if necessary.

1. Main Bible building (School of Biblical Studies) finished and set up for offices and classrooms. Perimeter wall completed. Plant Maize and a vegetable garden to help feed students. Dorm rooms finished off.
2. Finish the two unfinished buildings on campus that would be turned into a tailoring school and more living space. This would allow us to start bringing an income into the school. Shade trees and grass for a professional campus look
3. Plant fruit trees for additional income

Here is where we badly need YOU. We had the money to make the initial purchase of the property but will have completely depleted our working fund and will still need to remodel the place. Our goal is to raise another \$40,000 to cover the remodel of the main building and dorm rooms and keep our bottom line safe for the monthly expenses of the school.

If you can help, send checks written to MIBI, memo "building project" to Green Valley church of Christ PO BOX 575, Noblesville, IN 46061. We would love to get most of the money in by end of August to complete the work as quickly as possible and start the new class.

In Him,

*Jim Dillinger*
